# Fan speed controller

## Type Saginomiya XGE

Fan speed controller XGE stabilizes condensing pressure by changing condenser's fan speed. The controller reduces fan noise and saves energy in low ambient conditions.

Widespread usage in refrigeration and air conditioning units. Extensive performance testing under different conditions and strict quality control procedures ensure trouble free operation for many years. Compact size, reduced weight and high degree of protection means that it can be mounted directly on refrigeration lines. Panel mounting also possible. Easy adjusting made by the turn of a setting screw situated on the top surface. Specially designed heat dissipation radiator ensures no overheating and extended lifetime.

XGE-EC version for EC fan motors.

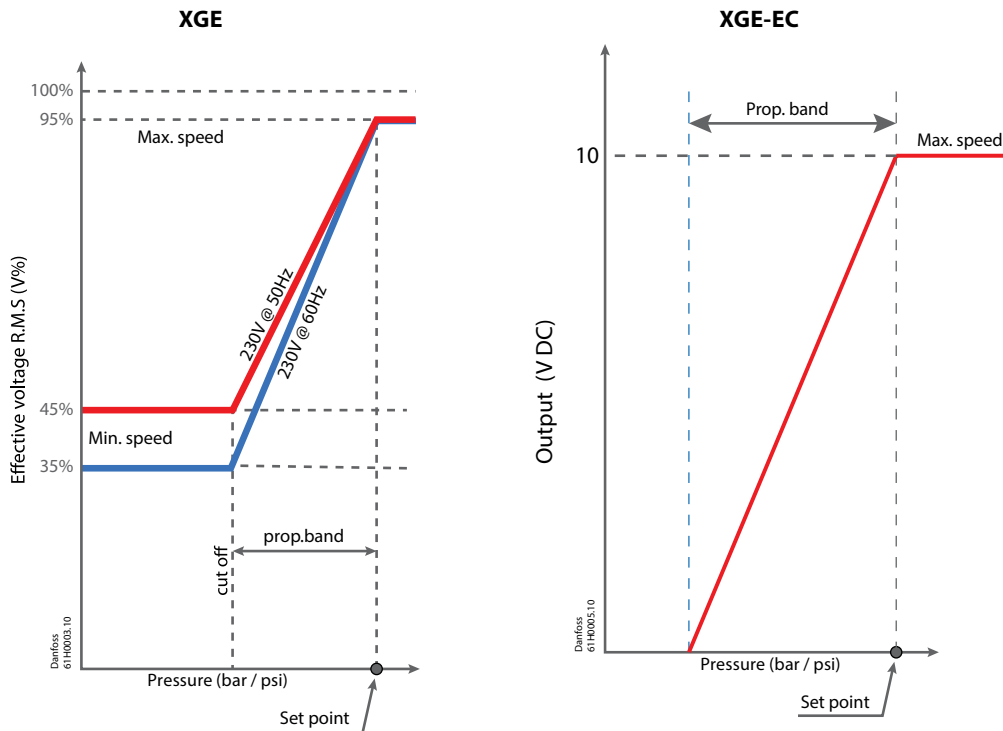

### Features

- Wide regulating range
- Compact design
- Male or female pressure connection
- Easy setting and adjusting
- Simple and easy electrical connection
- Cut off type or Minimum speed type
- Fitted with an electro-magnetic suppression filter

Approvals

CE in accordance to EMC directives, UL

Function

Fan speed controller keeps the condensing pressure at a steady level by regulating the speed of the AC/EC fan motors. When pressure is declining the controller decreases the output voltage changing the speed of AC/EC fan motor. The proportional band is a non-adjustable pressure difference between max. and min. pressure where the regulation occurs.

For min. pressure the controller can either operate with min. speed or completely cuts off the output voltage, depending on the type of the controller. XGE saves energy and reduces noise by lowering the fan speed or cutting it off.

**XGE Performance (EN 60770)**

Max. current	3A*)
Min. current	0.2A
Enclosure	IP65
Max. working pressure	47 bar / 681 psi
Supply frequency	50 / 60 Hz
Operating ambient temp.	-20 – 55 °C / -4 – 131 °F
Fluid temperature	-20 – 70 °C / -4 – 158 °F
Power supply	200 – 240 V AC
Pressure connection	7/16-20UNF female (with depressor pin) and male
Max. voltage output	95% of supply voltage for 50 Hz
Cut off / Min. speed	45% of supply voltage for 50 Hz
	35% of supply voltage for 60 Hz

\*) NOTE: XGE can also be used for 4A rated fans provided the ambient temperature does not exceed 40 °C / 104 °F. Please contact Danfoss regarding the maximum ambient temperature limits at ratings between 3A and 4A

### Setting

The easily accessible adjusting screw is situated on the top surface of XGE. The direction to turn the screw for decrease or increase in the setting pressure is indicated by arrow markings next to the adjusting screw.

Every turn of the adjusting screw corresponds to a specified change in the setting value. A punch hole on the adjusting screw helps keep track of the number of turns made.

XGE	Series	360° = 1 turn
	XGE-2	approx. 0.8bar / 11.6 psi
	XGE-4	approx. 1.5 bar / 22 psi
	XGE-6	approx. 2.5 bar / 36 psi

	XGE-4SE	approx. 1.5 bar / 22 psi
	XGE-6SE	approx. 2.5 bar / 36 psi

### Installation

The XGE is designed to be directly mounted onto the refrigeration line making the most of free space in a unit. In cases where space is even more limited, XGE can be fixed onto a simple bracket (supplied as an accessory) and screwed to a panel.

### Wiring and electrical connection

Electrical connection of XGE to the fan motor is simple and easy. With the use of a square "quick connect" plug, the connection is possible in 4 different directions, allowing many different machine configurations to accommodate XGE, depending on the position of the fan motor and orientation needed for the electrical cable. For wiring, a simple diagram is embossed onto the XGE surface and also indicated on the plug.

### Dimensions and weight

- Horizontal space: diameter of 66 mm / 2.59 in.
- Height: 90 mm / 3.54 in. (112 mm / 4.41 in. with plug fitted)
- Weight: 180 g / 6.35 oz
